CONNECTED, SMART, FLEXIBLE THE NEW WORLD OF MANUFACTURING

The repercussions of the Covid19 pandemic on industrial production have been far-reaching and long lasting. With supply chains being disrupted, the recovery has been slow but promising. Businesses with a progressive outlook are responding to the uncertainty by transforming their processes, work cultures and even business models.

TECHNOLOGY BECOMES THE LEVER TRANSFORMATION. MANUFACTURERS TODAY NEED

Improved visibility across the supply chain

Accurate demand forecasting

Agile manufacturing systems

Integrated systems with intelligence

HOW IS BOSCH HANDLING THIS CHALLENGE?

Bosch has already implemented cutting-edge connected solutions within the organization. Having worked across several manufacturing units and warehouses spread across geographies, we are positioned as an expert in **ERP implementation.** Bosch practitioner's approach gives us better visibility into possible challenges so we can create better, more comprehensive solutions for our customers.

INTEGRATED ERP WITH S4HANA - JOURNEY AT BOSCH $m \circ$

IMPLEMENTATION OF INDUSTRY 4.0

Implemented intelligent connected manufacturing solutions across 280+ manufacturing units worldwide

integrated from machines to the cloud

Improved supply chain efficiency across 750 + warehouses worldwide

Bosch is one of the largest users of the SAP software making us an expert in the ERP implementation domain

Bosch Connected Devices & Solutions offer intelligent sensor devices and integrated solutions for condition monitoring and predictive maintenance

Introduction of supply chain control tower to improve inventory movement visibility and accuracy in delivery time calculations.

ENABLING INTELLIGENT MANUFACTURING WITH MANTHANA

MantHANA is a unique manufacturing template enabling intelligent digital transformation facilitating seamless integration with the OT layer

THE NEW FACE OF MANUFACTURING WITH BOSCH

Enabled with the right technologies, Bosch envisions to create factories of the future that will produce game-changing results

Higher Visibility and Transparency Shopfloor to Topfloor integration providing real time visibility

Key Solutions: Realtime KPIs, Dashboards on SAC

Higher Asset Reliability

Achieving higher plant productivity through better asset utilization, lower unplanned breakdowns

Key Solutions: Integrated Asset Performance Management

Efficient Warehouse Operations

Lower cost of warehouse operations, better inventory turns, visibility on WIP

> Key Solutions: AGVs, RFID enabled goods movement, EWM

Flexible and Responsive Supply Chain

Improved compliance to Estimated delivery time on Customer Order fulfilment

Key Solutions: IBP,

Production planning and scheduling, Track and Trace solution providing visibility on order fulfillment

Improved Product Quality

Achieving higher yield, Lower failure costs and improved First Time Right

Key Solutions: Early Warning Systems, Process interlocks through IT-OT integration, Advanced analytics

Sustainable Operations

Achieving optimal use of Energy and utilities

Key Solutions: Energy analytics insights for cost optimization

BENEFITS YOU CAN MEASURE

Choose a technology partner that has the experience, expertise and tools to help you not just strategize but also operationalize digital transformation.
